

Lake Havasu State Park

BOAT RAMP AND PARKING LOT

The Arizona Department of Transportation (ADOT) and US Army Corps of Engineers are assisting Arizona State Parks (ASP) with a park enhancement project at Windsor Beach in Lake Havasu State Park, Mohave County, Arizona.

Due to an increase in park use, there is an increasing need for improved recreational facilities at Lake Havasu State Park and Windsor Beach. This project will construct a new boat launch area for oversized boats, a boat staging area, additional parking facilities for larger vehicles, a new park exit, and a beach area along the London Bridge Channel with upgraded multi-use pathway and lighting throughout.

Construction start date is anticipated to begin in 2014, avoid the peak visitation months, and last approximately 3 months. During construction, Lake Havasu State Park will remain open to the public, but periodic restrictions may be required at individual facilities as project elements are constructed. The park enhancement project is funded with ASP funds and Land and Water Conservation funds administered by the National Park Service.

This notice serves as your invitation to review the proposed project based on the information outlined above. If you have any specific concerns or suggestions pertaining to this specific proposed project, please let us know.

ADOT Project No. 095 MO 185 H8193 01D
